EXPERIENCE

Dequode Solutions (Formerly Techracers), Solution Engineer

Jan 2018 - Current

Project : **Fandom Sports** - interactive mobile application for passionate sports fans to play, predict and get rewarded on real-time sport and esports events.

Role and responsibilities:

- Liaising with product stakeholders and Business Analysts for translating user stories into technical requirements.
- Sprint planning, allocation and contributing in Scrum for tracking and reviewing progress.
- Implementing business UI logic on React-native platforms to present raw API data into interactive mobile application pages based on requests from users.
- Building asynchronous API call for parallel data consumption on web page.
- development and hosting using Firebase.
- Building responsive pages (Angular, HTML5, CSS3, Bootstrap) and API integration for dynamic UI.
- Full cycle Test-Driven Development and deployment using GIT / Diawi / JIRA toolsets.
- Conducting peer-reviews for code deliverables and mentoring junior developers.

Project : **SGPay** - SGPay is a 3rd generation wallet platform. SGPay uses blockchain and is used as an incentive and utility token on the SGPay platform.

Role and responsibilities:

- Implementing e-wallet for Ethereum and bitcoin transfer, based on blockchain.
- Implementing authentication and access control including M-PIN.
- Developing typescript based app for the e-wallet.
- Publishing, maintaining and documenting application.
- Developing and executing functional and user acceptance tests to assure quality project deliverables.

EDUCATION

Bachelor of Engineering (Electronics and Communications), RGPV

2013-2017
